BUS TOUR REGISTRATION

Tuesday, October 18, 2016
BUS TOUR REGISTRATION CLOSING ON SEPTEMBER 30th

Only Registered & Paid Attendees to the symposium will be eligible to register for the bus tour. *Tour is FREE with event registration and is limited to the first 40 registrants.

REGISTER ONLINE AT WWW.TRIDEC.ORG

Please Print Name EXACTLY as it appears on Photo Identification:

First Name	MI	Last Name
Contact Phone	Email Address	
United States Citizen? _____ YES _____ NO		

All participants MUST:

1. Be at TRAC by 7:30 AM for departure at 8:00 AM. (*Return is approx. 1:00 PM*)
2. Be a U.S. Citizen and at least 18-years of age.
3. Have PHOTO ID available at the time of the tour in order to receive their security badge (i.e. valid driver's license, military ID or passport).
4. Bring a sack lunch. No lunch is provided. Water and snacks will be provided.

**PLEASE NOTE: CAMERAS, CELL PHONES OR OTHER RECORDING DEVICES
ARE PROHIBITED AND WILL NOT BE ALLOWED ON THE TOUR BUS.**

Registered and paid Symposium attendees are invited to attend a Hanford Site Bus Tour the day before the event. Tour is approximately 5 hours long. Tour departs/returns to the TRAC facility. Tour agenda available on separate flyer. Only 40 seats are available and are issued on a first come, first served basis.

2016 US DOE Bridging Partnerships Small Business Symposium Hanford Site Bus Tour Schedule - Tuesday, October 18, 2016

The bus is scheduled to leave at 8:00 a.m. **Please arrive 30 minutes early** to ensure enough time for security badging. This tour is approximately 4 hours in duration. Restrooms will be available on the bus.

Please note: Clothing for participation in the tour must be appropriate for an industrial environment. Anyone not dressed appropriately will not be allowed on the tour. Closed-toed shoes are **MANDATORY**. Sandals, flip-flops, thongs, or open toe/open heel shoes are prohibited. Short-sleeve shirts, knee-length shorts, or "capris" are acceptable but skirts and sleeveless shirts are not allowed. Long pants are encouraged and highly recommended.

DRAFT TOUR AGENDA **Depart TRAC via Bus**

All tour participants will board buses at the TRAC. A Hanford employee will provide a guided tour of the Hanford Site, which includes an overview of Hanford's role in the nation's defense effort during World War II and the Cold War, as well as information on today's environmental cleanup mission. The tour route includes a drive by of Hanford's 300 Area where uranium was fabricated into fuel rods; the nine nuclear reactors in the 100 Area located along the Columbia River where the fuel rods were irradiated to produce plutonium for nuclear weapons; and the original Hanford and White Bluffs town sites. Additionally, the tour includes information on today's cleanup mission at Hanford. Visitors will have an opportunity to get off of the bus for briefings at three stops during the tour: Hanford's Cold Test Facility, the B Reactor, and the Environmental Restoration Disposal Facility.

Stop #1 – Cold Test Facility (CTF)

The Cold Test Facility is a full-scale mockup of a single shell storage tank at Hanford, with the height, weight, and riser dimensions exactly the same as they are found on the Site. Workers can simulate the kinds of conditions that would be found inside a tank, while also testing new equipment and technologies which they believe could help remove tank waste that is in difficult-to-reach places or in a semi-solid state. With many tanks to be emptied on the Site, the CTF is expected to continue to provide crews with the opportunity to test new ways to safely remove the waste in the years to come.

Stop #2 – Plutonium Finishing Plant

The Plutonium Finishing Plant, also known as PFP, represented the end of the line (the final procedure) associated with plutonium production at Hanford. PFP was also known as "Z-Plant" due to the fact that no further Hanford activity related to plutonium production would be done after the plutonium had been processed here. The plant began operations in 1967.

Stop #3 – ERDF

The Environmental Restoration Disposal Facility (ERDF) is a massive landfill located in the central part of Hanford. The facility, built in 1996 for Hanford cleanup wastes, was designed for expansion as needed. The fourth and largest expansion of the facility was completed in February 2011. ERDF now has a disposal capacity of 1.4 million tons of contaminated material and cover the same area as 52 football fields. Since the facility opened, nearly 12 million tons of low-level radioactive and hazardous waste has been buried there.

TRAVEL back to TRAC - End of Tour.

CONFERENCE AGENDA

TUESDAY, OCTOBER 18

7:30 AM – 8:00 AM	Registration and Bus Loading	TRAC
8:00 AM – 1:00 PM	Bus Tour of the Hanford Site (pre-registration required)	FOYER
